**ON COURSE TO
 A BETTER CLIMATE!
 CO₂ neutrality by 2050**

**KLIMAPAKT
FLENSBURG**

Flensburg auf Klimakurs!

An entire city is committed to the future: An unique combination of companies, institutions, public bodies and private commitment is shaping the future up north. The Klimapakt Flensburg e. V. exists since December 2008. It is a platform for joint climate protection-related action in the region of Flensburg.

An entire city is working hand in hand to achieve the following ambitious goals:

- **Reduction of energy consumption**
- **Increase of energy efficiency**
- **Reduction of greenhouse gas emissions by 30 % by 2020 ***
* compared to 1990
- **CO₂ neutrality of the city of Flensburg by 2050**

FLENSBURG ON COURSE TO A BETTER CLIMATE

The goal of CO₂ neutrality in the city of Flensburg cannot be achieved by the activities of Klimapakt Flensburg e. V. alone. All people of Flensburg, organisations and companies have to take responsibility here. Climate friendliness – whether carried out by an individual or an organisation – can be lived everyday! A contribution to climate protection can also be made by joining the non-profit organisation or being involved in the Youth Group of Climate Pact.

The Climate Pact works: According to Flensburg's energy and CO₂ balance, Climate Pact members reduced greenhouse gas emissions by 23 % between 2010 and 2016 through numerous activities within their spheres of influence!

Youth Group of Climate Pact

ROLE MODEL IN CLIMATE PROTECTION

In May 2012, the Federal Minister for the Environment Dr. Norbert Röttgen honoured the city of Flensburg for the Climate Pact Flensburg and thus appreciated this special commitment for climate protection. The reason for this appreciation was the approval of funding within the framework of the new national programme „Master Plan 100 % Climate Protection“ from the national climate protection initiative with a runtime until June 2018. Since then Flensburg is one of the 19 pioneers of local climate protection in Germany!

Since 2016 the city of Flensburg is also in close cooperation with the project „Rückenwind – Klimaschutzregion Flensburg“ (an amalgamation of 34 communities in the region of Flensburg) as a role model within the project „Masterplan 100 % Klimaschutz“. This specific combination is nationwide unique and an exemplary for other regions.

Our Climate Pact mascot „Kalle Karton“
